Power adapter

■ Connect the power cable

1. Make sure that the printer power switch is in the off "○" state.
2. Connect the power adapter to the printer.
3. Insert the other end of the power adapter into a nearby socket.

Power Off | Power on

■ Connect a USB cable

1. Connect the USB cable to the printer.
2. Connect the USB cable to the PC.
3. Turn on the power switch of the printer to the - state.

► Connect to PC

Installation consumables

■ Inner paper roll mounting

1. Put the paper roll into the paper bin in the direction shown. There is no need to use a paper roll (because the paper bin contains a paper roll roller). Move the right guide paper to fix the paper width according to the paper width, and pull the front end of the paper roll out over the rubber roll.

Assemble 80mm paper roll

After adjusting the roll baffle, the 58mm roll can be used
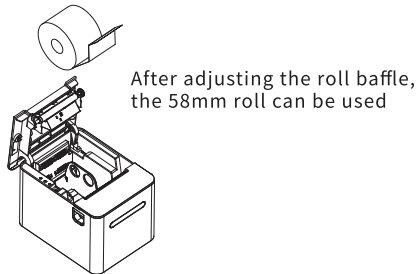

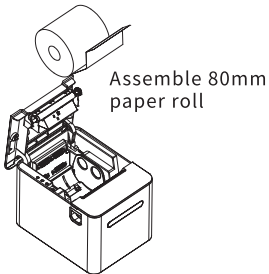

2. Close the cover of the bill machine, and tap downward until you hear a click, indicating that the cover is closed.
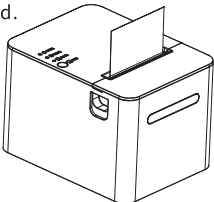

Button operation	Function description
FEED	Press the FEED button and the printer will travel a certain distance
	Press and hold the FEED button, and the printer keeps moving until you release the button and stop
Print the self-test page	Press and hold the FEED button to start up, automatically print the self-test page, and stop after printing
Factory data reset	After the printer starts up and initializes, press and hold the FEED button for more than or equal to 8s to print "Factory Settings restored successfully" and stop
